

Customer Journey Map

Date	30 June 2026
Team ID	xxxxxxx
Project Name	Rising Waters: A Machine Learning Approach to Flood Prediction
Maximum Marks	3 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions What does the customer do?	• Open the Flood Prediction Web Application. • Enter rainfall and weather parameters. • Submit the prediction request.	• System preprocesses the data. • ML model predicts flood risk. • Prediction result is generated.	• View flood prediction result. • Issue alerts if flood risk is high. • Plan evacuation and resource allocation.
Touchpoint What part of the service do they interact with?	• Flask Web Application. • Input Form. • Weather Data Fields.	• Prediction Engine. • Machine Learning Model. • Backend Processing.	• Prediction Dashboard. • Alert Notification. • Reports , Visualization.
Customer Thought What is the customer thinking?	• Is the data entered correctly? • Will the system provide an accurate prediction? • Can it help prevent flood damage?	• The system is analyzing the weather data. • I hope the prediction is reliable. • Waiting for the result.	• The prediction can help us prepare. • We should take preventive action. • Resources must be deployed quickly.
Customer Feeling What is the customer feeling?	• Concerned. • Hopeful. • Curious.	• Anxious. • Expectant. • Trusting the system.	• Confident. • Prepared. • Relieved if flood risk is low.

Process Ownership Who is in the lead on this?	Meteorological Department / Weather Data Provider	Machine Learning Prediction System	Disaster Management Authority
Opportunities How can we improve this stage?	• Improve real-time weather data collection. • Integrate IoT weather sensors. • Automate data validation.	• Improve model accuracy. • Add continuous model retraining. • Reduce prediction time.	• Send SMS , Email alerts. • Deploy on IBM Cloud. • Add flood maps and evacuation routes.
