

Data Flow Diagram

Date	30 June 2026
Team ID	xxxxxx
Project Name	Rising Waters: A Machine Learning Approach to Flood Prediction
Maximum Marks	3 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Weather Data Provider, Disaster Management Authority).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Data Collection, Data Pre-processing, Flood Prediction).
Rectangle (solid fill, no number)	Data Store	A place where data is stored for later use (e.g., Weather Database, Prediction Results Store).
Labeled arrow	Data Flow	The movement of data between external entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
